# Subject index of volume 31

Adriamycin 373
Antibody
– anti-idiotypic 151, 273
– chimeric B72.3 349
– dependent cellular cytotoxicity 207
– human anti-mouse response 226
– hybrid hybridoma 157
– monoclonal 65, 202, 207, 226, 231, 269, 278, 365
– OKT3 278
Antigen
– carcinoembryonic 197
– CD14 292
– epithelial membrane 65
– H-2 164
– H-2K$^b$ 115
– leukocyte 93

BCG 182
Bestatin 187
Bladder cancer 182
Bone marrow transplantation 236
Breast cancer 65, 81, 191, 269, 381

Carcinoembryonic antigen 197
Chemotaxis
– neutrophil 261
Chimeric B72.3 349
Chromosome 250
Colorectal cancer 261
Cyclophosphamide 121
Cyclosporin 312
Cytokine 60
Cytotoxicity 169, 243
– ADCC 207
– cellular 342, 349
– lymphocyte 231
– T lymphocyte 121
– thrombocytes 325
– tumor 11

Doxorubicin 202

Effector cell
– targeting 207, 349
Epithelial-membrane antigen 65
erb B gene 115

Glycolipids 99
Granuloma formation 99
Growth factor
– Gm-CSF 231

Head and neck cancer 176
Hybrid-hybridoma antibody 157
Hydatiform mole 187

Immunity
– anti-tumor 115
– cell-mediated 325
Immunocompetence
– breast cancer 381
– hepatocellular carcinoma 107
– leukemia 250
Immunoconjugates 157, 197, 202, 207, 278, 285
Immunoliposomes 285
Immunological deficiency syndrome 250
Immunomodulation 187, 221, 305, 321, 373
Immunosuppression 312, 325, 335
Immunotherapy 28, 146, 182, 207, 261
– chemo 129
Indomethacin 373
Interferon 213, 255
– alpha 305, 321
– gamma 93, 255, 292, 321
Interleukin-2 11, 53, 146, 182, 207, 231, 297, 305, 312, 342
– receptor 76
– recombinant 28, 169, 176
Interleukin-6 49

Leukemia
– murine 236
– myeloid 44
– pre-leukemia 250
– T cell 213
Lipopolysaccharide 88
Liver cancer
– hepatocellular carcinoma 107
– line 10 hepatocellular carcinoma 297
– metastasis 243, 285, 305
Lymphocyte 11, 28, 76, 236, 365, 381
– antigen 93
– CD4$^+$clone 1
– cytotoxic T 121
– cytotoxicity 231
– interaction 19
– LGL-CF 60
– tumor infiltrating 169
Lymphokine 207
– activated killer cells 11, 28, 37, 44, 49, 53, 139, 146, 255, 325, 342, 349

Macrophage 88, 325, 335
Mafosfamide 221
Melanoma 243, 278
Melphalan 129
Metastasis 81, 191, 243, 285, 305
Methotrexate 197
MHC class 1 molecules 19
Monoclonal antibody 65, 202, 207, 226, 231, 269, 278, 365
Mucins
– circulating 269
*Mycoplasma capricolum* 88

Natural killer cells 44, 176, 325, 335, 381
Natural resistance 81
Necrosis factor
– alpha 88

Ovarian carcinoma
– epithelial 169
Oxazaphosphorines 221

Papillomavirus 164
Penicillin-V-aminidase 202
Polysaccaride K 261
Prostaglandin 342
E2 335, 358, 373

Quercetin 358

Renal cell carcinoma 1, 321, 325, 335

Suppressor cells
– T 121, 335
Suppressor factors 151

T cells
– immune 297
– leukemia 213
– splenic 129
– suppressor 121, 335
Toremifene 381
Transdiaphragmatic blockade 365
Trophoblastic disease 187
Tumor
– autologous killing 60
– cell lysis stimulation 19
– cytotoxicity 11
– infiltrating lymphocytes 169
– lysis 19, 49, 53, 60
– necrosis factor 99, 243, 255
– targeting 157
– vaccines 273
– xenografts 157, 285
Tumorigenicity 164, 358
Tumor type
– bladder 182
– breast 65, 81, 191, 269, 381
– colorectal 261
– GW-39 197
– head and neck 176
– leukemia 44, 213, 236, 250
– liver 107, 243, 285, 297, 305
– melanoma 243, 278
– Meth-A 273
– MOPC-315 129
– ovarian 169
– pulmonary 81
– renal cell 1, 321, 325, 335

Urothelial cells
– human 93

Vinblastine 157
Virus
– HTLV-1 213
– papilloma 164
– reactivation 191
